Aéroports de Paris **Change in the financial statements presentation**

General principles

From the year ended 31 December 2011, Aéroports de Paris has adopted a new financial statements presentation consisting of the implementation of the option offered by the standard on Interests in Joint Ventures (IAS 31) and consolidating jointly controlled entities using the equity method. This change in methodology allows to comply with IFRS 11 which removes the method of proportionate consolidation and to provide more relevant information, this practice being commonly used in the airport sector.

A distinction is now made between the "profit/loss of associates from operating activities" and the "profit/loss of associates from non-operating activities".

The net result of associates from operating activities is accounted for between the EBITDA and the Operating Income from Ordinary Activities. It consists of Retail JVs, Real Estate JVs and the stake in Schiphol Group.

The net result of associates from non-operating activities is accounted for as previously, below the operating income. It consists of the other associates.

Furthermore, the sale of the 80% stake in Alyzia group resulted in the removal of the segment "Ground handling and related services". The ground handling activities of Alyzia group are accounted for "discontinued activities" under IFRS 5 and the 100% stake in Alyzia Sûreté (Security) is transferred to the segment "Other activities".

From 1 January 2012, the 20% share of the net result of the residual stake in Alyzia group is accounted for "profit/loss of associates from non-operating activities".

2010 *pro forma* financial statements have been prepared in accordance with the changes described above.
